Deetken Impact

FOREWORD

2025 reaffirmed a defining lesson of impact investing: the resilience that leads to lasting progress is built through connection. Across Latin America and the Caribbean, the most durable solutions emerged where investors, entrepreneurs, communities, and institutions worked together to channel capital toward shared economic, social, and environmental goals. In a year defined by emerging opportunities and evolving markets, our partnerships demonstrated that collaboration is not only a driver of meaningful impact, but also a foundation for resilient growth and long-term value creation.

Throughout the year, we deepened partnerships with investors, fund managers, development institutions, impact enterprises, and community organizations committed to advancing climate resilience, gender equality, and inclusive economic development across the region. We were proud to launch the Inclusive Climate Action Fund in partnership with the Government of Canada, which will expand access to climate finance for underserved communities and help to ensure that the transition to a low-carbon economy creates opportunities for those who have historically been left behind.

In a year defined by emerging opportunities and evolving markets, our partnerships demonstrated that collaboration is not only a driver of meaningful impact, but also a foundation for resilient growth and long-term value creation.

Alexa

Alexa Blain,
Managing Partner

Across our investment platforms, we remained focused on deploying capital with discipline, purpose, and measurable impact. Through the Ilu Women's Empowerment Fund, we completed 11 investments that support women entrepreneurs, strengthen gender-inclusive businesses, and create pathways for their greater economic participation and leadership. These milestones reflect a principle that continues to guide our work: durable financial performance and meaningful impact are mutually reinforcing outcomes.

We are deeply grateful to our investors, partners, portfolio companies, and stakeholders whose trust and collaboration make this work possible. Together, we continue to demonstrate that when capital is deployed intentionally and in partnership with those closest to the challenges, it can generate attractive financial returns while advancing a more resilient, equitable, and sustainable future for Latin America and the Caribbean.

OUR INVESTMENT STRATEGIES

We invest in transformative businesses and projects across Latin America and the Caribbean to generate competitive returns while strengthening the foundations for sustainable and inclusive growth. Through our family of funds, we direct capital toward solutions that address pressing social and environmental challenges, advance gender equality, and strengthen resilience.

Climate Action

We finance businesses and projects that accelerate the transition to a low-carbon economy, help communities manage climate risks, and build long-term resilience.

Women's Empowerment

We invest with a gender lens to expand economic opportunities for women, promote inclusive growth, and strengthen women's participation in leadership and decision-making.

Economic Development

We provide flexible financing solutions that help mission-driven businesses scale their impact, drive sustainable economic growth, and contribute to more resilient and prosperous communities.

CLIMATE ACTION

Climate action represents one of the most significant investment opportunities of our time. Across our portfolio, we support climate mitigation solutions that reduce emissions, expand clean energy generation, improve resource efficiency, and accelerate the transition to a low-carbon economy. These investments not only contribute to global climate goals, but also strengthen energy security, improve access to essential services, and create new economic opportunities.

As climate impacts become increasingly evident across the region, we are also expanding our focus on adaptation and resilience solutions that help businesses and communities respond to changing environmental conditions.

Time and again, we've seen that the businesses best positioned for the future are those leading the transition to a low-carbon economy while helping communities adapt to climate change. Climate action isn't just an environmental imperative, it's becoming a defining characteristic of strong, competitive companies. By investing in practical climate solutions, we're helping build economies that are better prepared for the challenges and opportunities ahead.

Fernando

Fernando Alvarado, CEO
Deetken Impact Sustainable Energy

PORTFOLIO COMPANY FEATURE: CHALATENANGO SOLAR

Our journey with the Chalatenango Solar team began with an earlier investment in Ahuachapán Solar. That initial partnership provided an opportunity to build a strong working relationship while supporting the development of clean energy infrastructure in El Salvador. As the sponsor's vision expanded, so did our partnership.

Building on that foundation, Deetken Impact Sustainable Energy participated in the development of Chalatenango Solar, a 5MW solar PV project that reached commercial operation in 2025. Beyond providing capital, we supported the project through our Investment, Enterprise, and Sustainability (INES) Technical Assistance Facility, helping strengthen investment readiness, optimize technical performance, mobilize additional capital, and enhance community engagement.

Today, Chalatenango Solar generates nearly 10 GWh of clean electricity annually—enough to power approximately 3,500 Salvadoran households—while avoiding more than 7,000 tonnes of CO_2 emissions each year and supporting El Salvador's transition to a more resilient, low-carbon energy system.

WOMEN'S EMPOWERMENT

We know that strong and inclusive economies depend on the full participation of women. Advancing gender equality remains central to our investment approach, as we support businesses that expand opportunities for women as entrepreneurs, employees, beneficiaries, and decision-makers.

Through gender-smart investment practices, targeted financing, and technical assistance, we help companies create more equitable pathways to economic participation and advancement. Our work addresses persistent barriers that limit access to capital, leadership opportunities, and financial services, while supporting business models that foster inclusive growth. By investing in women, we help unlock lasting social and economic value that extends across communities, strengthening resilience for generations.

Magali

Magali Lamyin, Managing Partner

I've always believed that advancing gender equity isn't simply the right thing to do, it's one of the smartest investment decisions we can make. Businesses become stronger when women have equal access to leadership, capital, and economic opportunity, and those gains ripple far beyond the enterprise itself.

PORTFOLIO COMPANY FEATURE: SALUD FÁCIL

CLINICS SERVED	**PATIENTS ANNUALLY**	**WOMEN**

Access to quality healthcare often depends on access to quality diagnostic equipment. Across Mexico, many healthcare providers serving low-income and underserved communities face significant barriers to acquiring the advanced reliable diagnostic technologies needed to deliver timely, high-quality care - particularly for women.

Through the Ilu Women's Empowerment Fund, Deetken Impact supports Salud Fácil, a specialized medical equipment leasing company that helps healthcare providers access technologies such as mammography, ultrasound, MRI, CT, and X-ray equipment, enabling clinics and hospitals to expand access to critical diagnostic and screening services that would otherwise remain out of reach.

We had the opportunity to witness firsthand the impact of this approach. From a historic hospital serving low-income communities to a women-led breast cancer screening clinic, healthcare providers are using modern equipment to improve diagnostic accuracy, reduce wait times, and expand access to essential women's health services.

Salud Fácil demonstrates how targeted financing can help close critical healthcare gaps, ensuring that advanced medical technologies reach underserved communities while improving health outcomes and expanding access to care for women in Mexico.

Sustainable economic growth depends on businesses that address critical market gaps, and generate access to essential products and services. Across Latin America and the Caribbean, many high-impact enterprises remain underserved by traditional sources of capital despite their potential to drive meaningful social and economic progress.

Our approach is centered on providing financing solutions that align with the realities of growing businesses. Through tailored investment structures designed around business models, cash flow cycles, and growth trajectories, we help companies strengthen their funding capacity, unlock additional financing, and accelerate sustainable growth.

By partnering with enterprises that expand financial inclusion, strengthen local value chains, improve access to education, healthcare, and housing, and support climate resilience, we contribute to more inclusive and resilient economic systems. These investments generate benefits that extend beyond individual businesses, creating opportunities for workers, suppliers, customers, and communities throughout the region.

PORTFOLIO COMPANY FEATURE: DISPOWER

1.1K	43K	14K	159
RURAL VILLAGES SERVED	PEOPLE ACCESSED CLEAN ENERGY	HOUSEHOLDS ELECTRIFIED	SCHOOLS ELECTRIFIED

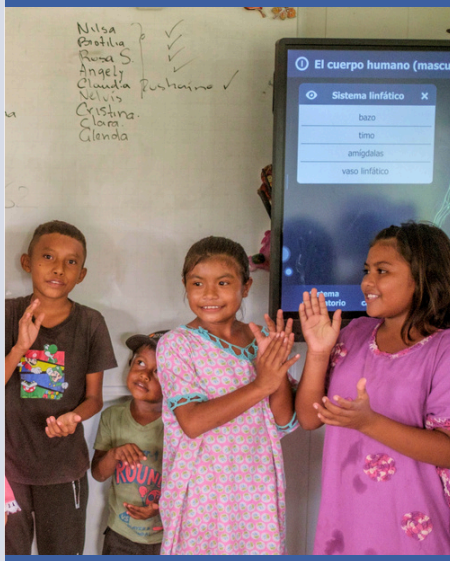

Access to reliable energy remains one of the most significant barriers to economic opportunity and climate resilience in many of Latin America's most remote communities.

Through support from the Resilient Futures Fund, the Ilu Women's Empowerment Fund completed a 2X-qualified investment in Dispower, a Colombian company providing off-grid solar energy solutions to underserved rural populations. By the end of 2025, Dispower was serving more than 1.1K rural communities and providing clean, reliable electricity to over 14K households and 43K individuals. The company had also expanded energy access to 159 schools and 128 community organizations.

Operating in some of Colombia's most remote regions, Dispower works closely with local women leaders throughout project design, implementation, and maintenance. This collaborative approach helps ensure solutions respond to local needs while building long-term community ownership and resilience.

The impact extends well beyond electrification. Access to reliable energy creates opportunities for education, entrepreneurship, communication, healthcare, and community development, while strengthening resilience to economic and environmental challenges. Dispower demonstrates how community-centered climate solutions can deliver meaningful environmental outcomes while improving quality of life for thousands of people traditionally excluded from essential infrastructure.

IMPACT INVESTING IN PRACTICE

Our approach to impact investing is based on the conviction that financial performance and impact are mutually reinforcing. By investing in businesses where impact is embedded in the core business model, we ensure that growth in revenue and profitability is directly linked to positive social and environmental outcomes. Supported by a rigorous impact management framework aligned with global best practices, we seek to deliver measurable, scalable impact alongside strong risk-adjusted returns.

Our contribution extends beyond capital. We help strengthen the broader impact ecosystem by mobilizing additional investment, sharing market insights and lessons learned, and advancing robust impact measurement practices. Through targeted technical assistance, we also support companies in building the capacity needed to improve performance, scale their impact, and attract further investment. Together, these efforts contribute to a more resilient, inclusive, and mature impact investing market.

SUSTAINABLE DEVELOPMENT GOALS

Deetken Impact invests in companies that meaningfully contribute to the United Nations' Sustainable Development Goals, recognizing SDG 5, Gender Equality, as key to achieving all 17, and advancing environmental and social impact.

Sustainable businesses that deliver competative, risk-adjusted returns for our investors

SOVENTIX CARIBBEAN, DOMINICAN REPUBLIC

One of the things I've come to appreciate most about impact investing is that lasting impact is never the product of a single investment decision. It is created through a disciplined process of selecting the right businesses, supporting them as they grow, measuring what matters, and continually learning from the results. That's why we built a framework that integrates impact into every stage of the investment lifecycle rather than treating it as something measured only at the end.

For me, that's what distinguishes impact investing at its best. Financial performance and positive outcomes reinforce one another because they're built on the same foundation. When businesses succeed by improving lives, strengthening communities, or protecting the environment, growth itself becomes a driver of impact. That's the kind of investing we believe creates lasting value; for investors, businesses, and the region.

José

José Lamyin,
Managing Partner,
Investment Management

CLIMATE FINANCE

Deetken Impact recognizes the importance of continuously strengthening how impact is measured and managed. Through the application of our proprietary climate finance taxonomy, we enhance the identification, classification, and tracking of climate-related investments and outcomes across our portfolio to assess contributions to both climate mitigation and adaptation objectives.

SOLÉCO ENERGY, JAMAICA

CLIMATE FINANCE INVESTMENT PROCESS

SCREENING: Identify high-potential, climate-aligned opportunities

DUE DILIGENCE: Assess business practices, risk, and impact

INVESTMENT: Structure investments that drive climate impact

PORTFOLIO MANAGEMENT: Actively manage for impact, performance & impact

CROSS-CUTTING PRINCIPLES	GENDER LENS	MEASURABLE CLIMATE IMPACT	SUSTAINABLE FINANCIAL RETURNS	STAKEHOLDER ENGAGEMENT
	Advance gender equality and women's empowerment	GHG mitigation, adaptation & resilience	Competetive risk-adjusted returns with long-term value creation	Build partnerships for lasting impact

GENDER EQUALITY

Gender equality is both an impact objective and a driver of long-term business strength. We recognize that companies that foster inclusion and opportunity are better positioned to innovate, adapt, and create lasting value, while contributing to stronger social and economic outcomes. Our approach integrates gender considerations throughout the investment lifecycle. By assessing gender-related risks, opportunities, and performance indicators, we support portfolio companies in strengthening inclusive business practices and expanding opportunities for women.

PUNTORED, COLOMBIA

Embedding a gender lens throughout the investment process leads to stronger decisions. It encourages us to identify risks others may overlook, uncover opportunities others may miss, and support businesses that are better equipped to grow, adapt, and compete over the long term.

Carl

Carl Black, Partner

Change starts from within. That's why we are committed to building gender awareness within our team, ensuring diversity at all levels.

Deetken Impact Directors identify as women

GENDER SMART AT EVERY STEP

SCREENING: Commitment to positive impact, transparency, and open to improve gender business practices

DUE DILIGENCE: Scoring against gender smart criteria aligned with 2X

INVESTMENT: SMART gender objectives established based on gaps identified and management commitment to continued progress

MONITORING & REPORTING: Measurement, evaluation, and reporting of gender metrics to investors

ENGAGEMENT: Tailored acceleration and engagement when required to advance gender business practices

2X CHALLENGE 2025

As Deetken Impact completed its first year participating in the 2X Challenge, we emerged as a leading private investor in the initiative, with ten qualifying investments representing more than three-quarters of recent Ilu Women's Empowerment Fund activity. Together, these companies are reaching more than 150,000 women clients through inclusive products and services, while providing quality employment opportunities for over 1,100 women employees.

These results underscore our long-standing commitment to advancing gender equity, and reflect the leadership, innovation, and dedication of the entrepreneurs and their teams working every day to expand opportunity, strengthen communities, and drive more inclusive economic growth across the region.

LAVCA WOMEN

We were thrilled to see the women of Deetken Impact recognized by LAVCA as leading and emerging voices in Latin America's investment landscape. Their recognition speaks not only to their individual leadership and expertise, but also to the collective importance of diverse perspectives in building a more inclusive financial ecosystem. From structuring gender-smart climate investments to supporting women entrepreneurs and strengthening local ecosystems, our team's dedication continues to shape how capital can serve as a catalyst for equity.

As we deepen our gender lens investing efforts and look ahead, we remain committed to unlocking even more gender-smart capital as a powerful driver of impact across all the Sustainable Development Goals.

ESG STRATEGY

Businesses today operate in an increasingly complex environment shaped by climate change, technological disruption, evolving regulations, and shifting stakeholder expectations. We view these challenges not only as risks to manage, but as opportunities to strengthen business performance and create long-term value.

Our ESG approach is built around active engagement with portfolio companies throughout the investment lifecycle. Beyond assessing ESG performance during due diligence, we work closely with management teams to identify material risks and opportunities, develop tailored Environmental and Social Action Plans (ESAPs), strengthen governance structures, and implement practical improvements that support sustainable growth.

This hands-on approach often includes ongoing strategic guidance, participation in ESG and sustainability committees, and technical assistance projects designed to help companies operationalize best practices and address key environmental and social priorities. By combining rigorous assessment with tailored support, we help businesses strengthen resilience, improve operational performance, and position themselves for long-term success.

48
COMPANIES RECEIVED GENDER ADVISORY

CASA FRANCESCHI, ECUADOR

Capital alone is rarely sufficient to unlock a company's full potential. Alongside financing, we provide technical assistance that equips investees with the capabilities, systems, and expertise needed to strengthen performance and maximize impact.

Our technical assistance programs support businesses in areas such as governance, impact measurement, ESG integration, gender equity, and operational and technical performance. By combining capital with targeted support, we help investees navigate challenges, unlock opportunities, and build stronger foundations for long-term success. This integrated approach strengthens organizational resilience while enhancing both investment performance and social and environmental outcomes.

The most rewarding part of our work is seeing investees develop new strategies and practices that continue creating value long after our engagement ends. Technical assistance is ultimately about supporting great businesses to become even stronger - equipping them to scale their impact, attract future investment, and thrive long after our work together is complete.

Senior Impact Officer

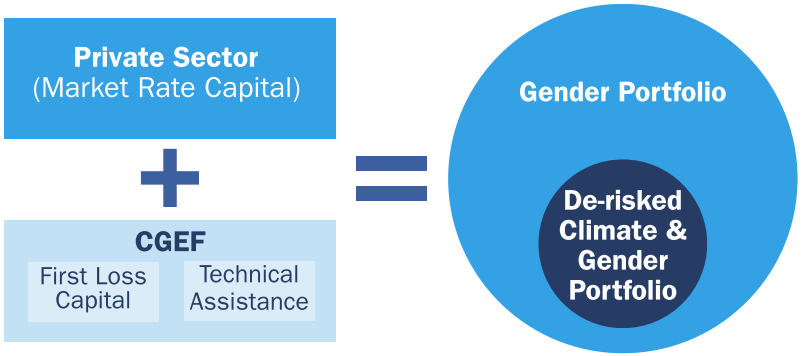

RESILIENT FUTURES FUND: DEMONSTRATING THE OPPORTUNITY AT THE CLIMATE-GENDER NEXUS

The transition to a more resilient and inclusive economy requires investment in solutions that address both climate change and gender inequality. The Resilient Futures Fund (RFF) was established to demonstrate that this intersection represents a compelling opportunity for both impact and investment.

Through a combination of catalytic capital and technical assistance, RFF enabled the Ilu Fund to expand its investment activity while strengthening the capacity of both the Fund and its investees to implement gender-smart climate strategies.

The program leveraged a first-loss tranche to mobilize 14x its value in investments, supporting five transactions across clean energy, sustainable agriculture, and green finance, while catalyzing additional private capital. Importantly, RFF also supported technical assistance with portfolio companies focused on climate risk management, green finance, inclusion of women smallholder farmers in agricultural value chains, and low-emission affordable housing.

Outcomes

- ✓ Demonstrated viability of investment approach
- ✓ Unlock capital at scale
- ✓ Catalyze gender and climate finance

The experience reinforces a key lesson: when paired with targeted technical assistance, investment can strengthen business performance, accelerate innovation, and create a demonstration effect that attracts additional investors and scales critical solutions.

64% women

30
HOURS HANDS ON TRAINING

100%
REGISTERED AS BUSINESS OWNERS

Across rural agricultural communities, women often play essential roles in production while remaining underrepresented in business ownership, financial management, and decision-making. Through its investment in Casa Franceschi, a sustainability-focused cacao trading company operating across Latin America, the Ilu Women's Empowerment Fund sought to address this challenge by pairing capital with targeted technical assistance.

In partnership with Fundación para Promover las Finanzas Inclusivas y la Gobernanza (FIG), the Fund implemented a gender-transformative training program designed to strengthen the entrepreneurial, financial, and leadership capacities of women cacao producers. The program provided more than 30 hours of hands-on training to smallholder farmers covering business management, leadership, marketing, and shared household and production responsibilities. The results were significant: 100% of women participants are now registered as business owners and actively managing key financial processes such as invoicing, compared to just 35% before the program.

Importantly, the initiative was designed with scale in mind. Through a train-the-trainers approach, Casa Franceschi's technical team was equipped to replicate the methodology directly with producers throughout its supply chain. Within six months, the company had already expanded the training to an additional 100 farmers and plans to integrate the approach into its broader sustainability programs, ultimately reaching more than 1,000 farmers.

KNOWLEDGE & ECOSYSTEM BUILDING

In 2025, Deetken Impact continued to strengthen the impact investing ecosystem by sharing insights, experience, and lessons learned from investing across Latin America and the Caribbean. Throughout the year, our team contributed thought leadership to publications including Forbes Centroamérica, The Operating Principles for Impact Management (OPIM), and Broadpeak, while continuing our popular Meet the Team series, which highlights the people and expertise behind our work.

We also remained actively engaged with investors, partners, and industry leaders through events including LAVCA Week in New York, the Future Energy Summit in the Dominican Republic, and the Latin American Impact Investment Summit (CLIIQ) in Ecuador. During International Development Week in Canada, Managing Partners Alexa Blain and Magali Lamyin joined Canada's Secretary of State, the Honourable Randeep Sarai, and partners from across the development sector to discuss how collaboration between government and private capital can accelerate resilient economic growth.

A defining moment of the year came at COP30 in Brazil, where the Honourable Julie Dabrusin, Minister of Environment and Climate Change, announced Canada's investment in Deetken Impact's new Inclusive Climate Action Fund (ICAF) as part of the country's international climate finance commitments. We were also honoured to be recognized at the Emeritus level of the ImpactAssets IA 50 for the first time, celebrating five years of this esteemed acknowledgement.

LOOKING AHEAD

The challenges facing Latin America and the Caribbean are vast, but so too is the opportunity. Across the region, entrepreneurs, communities, and local institutions are developing solutions that strengthen resilience, expand economic opportunity, and accelerate the transition to a more sustainable future. There is no shortage of ideas or ambition - what is needed now is the capital required to bring proven solutions to scale.

At Deetken Impact, we believe the next phase of impact investing in the region will be defined by the ability to mobilize larger pools of capital toward opportunities that deliver measurable financial, social, and environmental outcomes. Building on the strength of our portfolio and pipeline, we will continue investing in businesses that advance climate mitigation and adaptation, expand financial inclusion, and create pathways to shared prosperity. We remain committed to applying a gender lens across our investment approach, recognizing that more inclusive investments lead to stronger outcomes and more resilient communities.

Our ambition extends beyond growing our own portfolio. We seek to demonstrate what is possible, attract new investors to the region, and help unlock the capital needed to address challenges at the scale they demand.

The future of impact investing in Latin America and the Caribbean will not be shaped by any single investor. It will be shaped by collective action, long-term partnerships, and a shared belief that capital can be a powerful force for positive change. By bringing more investors to the table and directing more capital toward proven solutions, we have an opportunity to create impact that is not only meaningful, but transformative.

Latin America and the Caribbean has no shortage of innovative entrepreneurs or investment opportunities. The challenge is mobilizing capital at the pace and scale required. Our role is to demonstrate that investing in the region can deliver competitive financial returns while contributing to stronger economies, healthier communities, and a more resilient future.

Erik

Erik Wallsten,
Managing Partner

CAPITAL THAT CHANGES WHAT'S POSSIBLE

Across Latin America and the Caribbean, innovative businesses are solving complex challenges, strengthening communities, and creating new opportunities.

At Deetken Impact, we're committed to helping them grow through capital, expertise, and partnerships that enable long-term success.

If you're seeking measurable impact alongside financial performance, we'd welcome the opportunity to connect.
